

Public
Calling Office
Thuraya PCO-2110

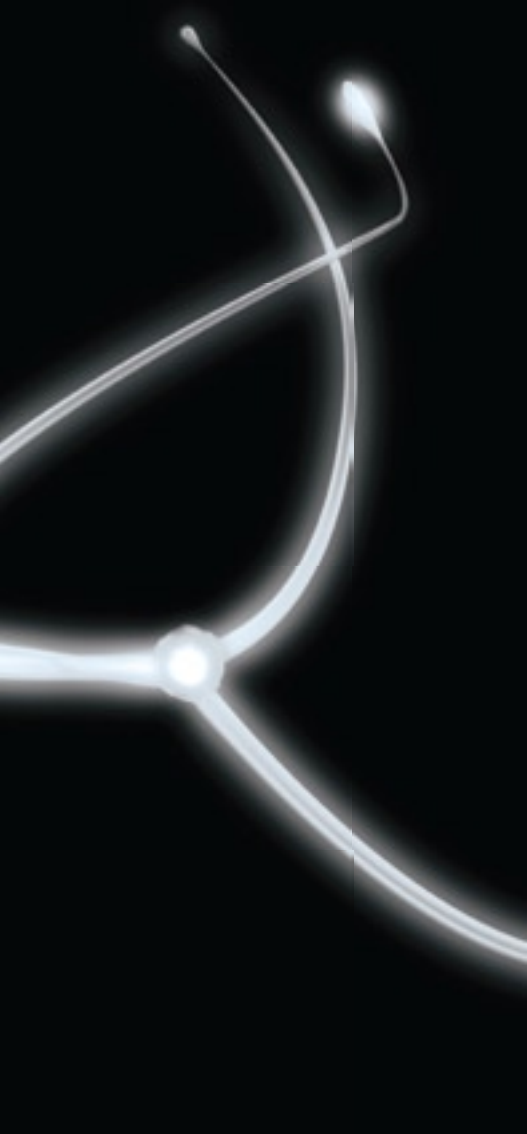

THURAYA 
stay close

Connecting Communities

Thuraya's rural telephony solutions provide a vital stimulus for economic growth and development in rural and remote areas within Thuraya's network.

Thuraya PCO-2110 is a powerful, versatile and cost-effective Public Calling Office offering seamless basic and advanced communication services that allow isolated communities to reach out to the world from remote regions.

Access beyond, go satellite

Valuable Communication

Through the use of satellite technology, the Public Calling Office provides a valuable channel of connectivity for people who cannot afford satellite phones, but require telecommunications services.

Thuraya PCO-2110 offers voice, fax, data and SMS services in a user friendly public telephone service station where customers can make domestic and international telephone calls, send and receive SMS messages and even browse the internet. The charges for these services can be modified by the operator to customize local requirements.

Thuraya PCO-2110 is designed with a multiple language interface to address the local business and communication needs of people across Thuraya's extensive coverage area that spans more than 140 countries in Europe, the Middle East, Asia, Australia and Africa.

Technology

Based on the latest microprocessor technology, Thuraya PCO-2110 is designed to meter outgoing calls, SMS and data usage and produce printouts containing call details and charges.

User Friendly Set-up

Thuraya PCO-2110 is user friendly in design, function and operation to ensure maximum user experience.

While the telephone is in use, date, time dynamic signal strength, GPS signal and SMS status of unread messages will be shown.

When the phone is not in use, you can view call charges and the call duration that are clearly displayed. The details of the call can be printed using the built-in thermal printer as a Call Bill after every call, SMS or data usage.

Features and Benefits

Benefits

- Affordable services in remote areas
- Displays call duration and charges
- Immediate billing upon completion of call sessions
- Operate in a private and comfortable setting
- Offer calls on credit

Applications

- Rural and on-road phone stations
- Natural disaster areas
- Farms and factories
- Armed forces camps
- Recreational camping sites
- Non-profit organisation sites
- Archaeological sites

Prepayment Call

Thuraya PCO-2110 allows you prepayment calls on an amount or time basis. The facility allows the owner to enter a predetermined amount that a customer would like to spend on the call, or the specific time of the call before initiating it. As soon as the configured amount/time ends, the call will automatically be disconnected.

Adding Service Charges and Taxes

The operator has the option of adding a service charge and local taxes to the rate charged by Thuraya. This feature is password protected to enable access to authorized personnel only.

Languages

Supports Arabic, English, French, Persian, Russian and Urdu.

Features and Benefits

SMS Compatible

Thuraya PCO-2110 supports sending and receiving SMS. The received SMS messages can be printed to include associated charges.

GmPRS (Mobile Satellite Internet)

Thuraya PCO-2110 supports GmPRS to generate speeds of up to 15 kbps uplink, 60 kbps downlink. Useful for over-the-air upgrades (for any tariff changes or software upgrades) downloads and internet browsing.

Call Memory

With a memory of 1,500 calls, Thuraya PCO-2110 allows the operator to select any serial bill number for reviewing in an individual or cumulative format.

Credit Facility

Thuraya PCO-2110 allows storage of up to 99 accounts. This additional advantage facilitates frequent callers to make their payments on a periodic basis.

Currency Format

The operator will have the option of billing customers based on the local currency or US dollars.

Alternative Power

In locations without electric power supply, the PCO-2110 can also be operated using solar panels or batteries.

Primary coverage area

Extended coverage area
